University of Trento

Department of Information Engineering and Computer Science

Degree course in Computer Science

Final Thesis

Development of localization system based on qr's recognition

Supervisor:
Prof. Luigi Palopoli

Graduant:
Giovanni De Francesco

Co-Supervisor:
Dott. Federico Moro

Academic year 2013-2014

A mio nonno e la mia famiglia,
sperando non ne abbiano mai bisogno

Contents

Chapter 1

The DALi project

In modern times the world move forward with incredible speed and creates new buildings aimed to engage people who use them, but often this environments are designed for adults with fully developed psychological and physical capabilities.

Acknowledgements

I would like to thank my supervisor Luigi Palopoli for his guidance during the work I've created.
Special thanks are for Federico Moro who helped me every time I had fallen when I was writing the algorithm.
Many thanks also to David Macii whose support was very helpful.

My gratitude goes to my girlfriend Giulia, my family and Federico Spada who helped me in dark moments.
I am pleased to acknowledge all the friends who stayed at my side in these three years: Giulio Fornasaro, Luca Zamboni, Roberto Zen, Andrea Cristiano, Andrea Panizza and Lorenzo lotto but also all my course mates, without them this time would have been boring.
